DETAILED ACTION

Acknowledged Receipt

1. Receipt is acknowledged of the amendment to the claims and remarks related to the previous rejection, both of which were filed on 07/21/2004. The above have been considered and entered.

Allowable Subject Matter

2. Claims 1-7 are allowed.

3. The following is a statement of reasons for the indication of allowable subject matter:

4. USPN 5122477 to Wolters et al and 5031144 to Persky both show a ferroelectric emitter having Applicant's recited configuration, except for a dielectric layer having a predetermined pattern is formed along the top surface of the ferroelectric layer and the insertion electrode to encapsulate the insertion electrode, and a dummy upper electrode formed on a side of the dielectric layer opposite the ferroelectric layer. However, the prior art of record fails to motivate or disclose the limitations of claim 1, with a dielectric layer having a predetermined pattern is formed along the top surface of the ferroelectric layer and the insertion electrode to encapsulate the insertion electrode, in combination with the remaining limitations of the claim.

5. Claims 2-7 are allowable due to their dependency.

6. Any comments considered necessary by the Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of reasons for Allowance."
